

# Презентация по 4 этапу индивидуального проета

Операционные системы

---

Скрипникова София Дмитриевна, НММбд-03-22

29 апреля 2023

Российский университет дружбы народов, Москва, Россия

## Цель работы

---

Прикрепить ссылки на свои страницы, выложить посты - выполнить задания 4 этапа индивидуального проекта. ## Выполнение лабораторной работы

1. Зашли на страницу сайта с помощью команды hugo server
2. Добавила данные о себе: вдобавила ссыки на страницы.

```
- icon: inst  
  icon_pack: fas  
  link: https://www.instagram.com/skripnikova_sofiia

title: Formatting Reports in Markdown
subtitle: Formatting Reports in Markdown
Markdown is a simple and effective way to format reports. It allows you to adibe headings.

# Summary for listings and search engines
summary: We have data, the content of which may change. For example, it is necessary to build a
report on cars delivering goods (abstract example). The number and numbers of cars leaving for the
flight are different every day, but the summary for each car is the same in its structure. Let's
move on from this.

R Markdown is done in multiple passes. At the same time, .md is first formed from Rmd, and then the
output representation is formed from it, the most popular is the html format.

In total, there are 2 options.

    You can insert the necessary blocks (assembled or templated) into the compiled .Rmd at the
stage of compiling the report.

    You can insert the necessary markdown inserts into the intermediate .md at the stage of
compiling the report.

## Выводы

---

Я узнала как менять информацию на сайте и смогла загрузить ссылки на свои страницы.  
Также научилась выкладывать посты на сайте.
